MEMORANDUM FOR: Chief, Information Systems Security
Group, OS

VIA: Chief, Real Estate and Construction
Division, OL

FROM: [REDACTED]
Chief, Headquarters Engineering Branch,
RECD/OL

SUBJECT: Project SAFE and ADSTAR Construction

1. Final construction plans are being formulated for the SAFE and ADSTAR installations which will be located in the GE Corridor area of the Headquarters Building. During formulation of these plans, it has been determined that satellite telephone closet GE78 will remain in the area. This telephone closet will be located within the SAFE computer center. It is requested that your office survey the area and inform us of any unique security requirements which must be incorporated into the construction phase of this project to allow this telephone closet to remain in the area.

2. A similar situation exists in the GE04 Subcorridor area. The GE0422 satellite telephone closet in that area will be located in both the ADSTAR facility and the Uninterruptible Power System room. We have initiated discussions with the Office of Communications to determine whether this closet could be removed from the area without jeopardizing phone service. Should that not be possible, it is requested that your office survey the area and inform us of any special security requirements that should be taken regarding construction in that area.

3. Should you have any questions regarding these construction projects, please contact [REDACTED] Chief, Electrical Section, Headquarters Engineering Branch, RECD/OL, Extension 7543.
